support both in their lives and work; the need for improved communication and consultation within the church; and the need to strengthen and complement parish work.

The contents, based on a summary survey of over 100 organizations conducted by the Glenmary Research Center, indicates that there are three types of area ministries represented by different types of organizations. The support group, the advisory group, and the action group.

Eight of the nine chapters present case studies of eight organizations engaged in area ministry in rural America. The cases are wide-ranging and diverse, both in scope and geography

An appendix gives definitions of terms used throughout the book; another appendix presents sample contributions and guidelines.

Although the book is primarily focused on rural areas, the truth is that the underlying premise of area ministry is applicable to parishes in other settings as well. The ideas revolving around social and religious problems set forth in the book have a usefulness to most parish priests. In addition, the cases provide fascinating reading apart from their sociological implications. A good investment of both time and money.

Stanley M. Grabowski
Boston, Ma.
